STEEL FRAME SHADE STRUCTURE

Protect your students, parents, employees or residents from the harsh Australian climate with the Shadeform Apex, the market's strongest steel framed shade structure.

WHY THE SHADEFORM APEX256?

- Individually Engineered and Certified steel frame and footings for safety and longevity.
- Computer designed and cut fabric membrane.
- Aesthetic and functional fabric curve shape for increased tension.
- 256m² of clear span shade eliminating the need for central posts or low edges.
- High central apex allowing installation over high playground structures.
- Fabric completely independent of the steel frame eliminating abrasive wear.
- One continuous membrane eliminating gaps.
- More vandal resistant than other structures due to its high apex design.

Shadeform's Apex meets the new DECS Policy requirements for Government Schools, regarding covered play area structures.

DURABLE
ELEGANCE

MATERIALS & CONSTRUCTION

The Shadeform Apex is an individually engineered and certified steel frame structured with an independent, radial, membrane fabric covering. The steel frame is professionally fabricated and powdercoated for superior strength and resistance to the elements.

Only the highest marine grade stainless steel fittings, fixtures and edgewires are used making the Shadeform Apex the most durable product of its kind on the market.

FABRICS

The Shadeform Apex structure can be covered with your choice of:

90% Polyester Mesh - A premium fabric used in many domestic applications. Weldable seams for increased strength and eliminates UV degradation of stitching.

Waterproof PVC Coated Polyester - 100% waterproof fabric with structural strength. (conditions apply)

(All of the above fabrics are fire retardant and carry a 5 year warranty)

APPLICATIONS

The Apex steel frame sail structure is ideal for covering external public and private spaces.

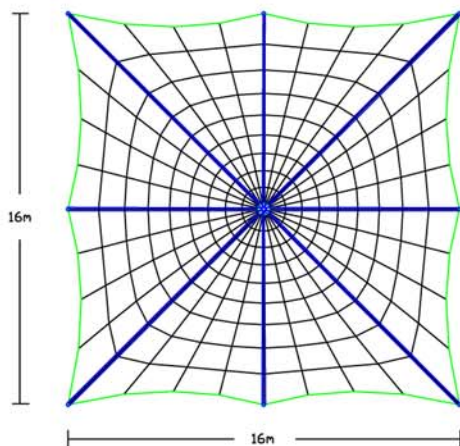

- Playgrounds
- Schools
- Commercial Applications
- Outdoor Seating

Aesthetic & Functional Alternative to:

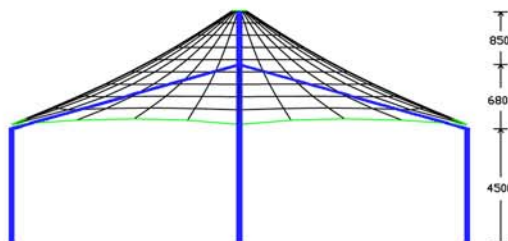

- Gabled Shade Structures
- Colourbond Structures
- Polycarb Structures
- Timber Gazebos
